

◆ CALL FORWARDING INSTRUCTIONS ◆

MetroPCS is a regional cellular carrier that offers customers two different types of call forwarding: Conditional Call Forwarding and Instant Call Forwarding. To activate call forwarding features, you must have a local phone number, meaning a number with a zip code in the MetroPCS coverage area. Since the cellular service isn't available in certain coverage areas, Conditional Call Forwarding will forward calls automatically to a local number when the MetroPCS phone isn't in the coverage area. Instant Call Forwarding will allow you to forward calls to a local regional number whenever you want.

MetroPCS Instant Call Forwarding

1. Dial “*72” (excluding the quotation marks) plus the 10-digit number the calls will be forward to on the MetroPCS phone. For example, if the number plus area code is 777-555-5555, you would dial *72-777-555-5555.
2. Press the “SEND” button on the phone key pad.
3. Listen for the call forwarding confirmation tone to verify that instant call forwarding is activated.

MetroPCS Conditional Call Forwarding

1. Dial “*74” (excluding the quotation marks) plus the 10-digit number the calls will be forward to on the MetroPCS phone. For example, if the number plus area code is 777-555-5555, you would dial *74-777-555-5555.
2. Press the “SEND” button on the cell phone key pad.
3. Listen for the call forwarding confirmation tone to verify that conditional call forwarding is activated.
